## BENEFITS

Even distribution of nutrients at low rates of application with minimal mower pick-up.

Balanced nitrogen and potassium formulation to promote healthy stress resistant turf.

Dual slow release nitrogen package provides consistent nitrogen release in any growing condition.

Specific formula increases photosynthesis and carbohydrate production to help compensate for reduced leaf area from aggressive mowing heights.

More W.I.N. per pound of nitrogen results in minimal nitrogen loss from leaching and volatilization.

Tru-prill granules begin to disperse within minutes of irrigation for better nutrient dispersion and less mower pick-up.

Safe for use on fine turf.

## DIRECTIONS FOR USE

- Apply *Tru-prill® 15-2-15* any time when the turf needs fertilizer.
- Watering is recommended to assist in working the product into the turf.
- When applying to finely mowed turf, mow for one day without buckets to reduce mower pick up.
- Use a clean, dry spreader. Do not leave unused product in spreader for an extended period of time.
- Allow 5-7 days before seeing a visual response from the application.
- Use a clean dry spreader. Do not leave unused product in a spreader.

## STORAGE REQUIREMENTS:
