

A foliar turf fertilizer that initiates a plant health response

GENERAL INFORMATION

- **Enfoss Foliar** fertilizer is a formulation of technical phosphite/phosphate with a high concentration of Phosphite.
- **Enfoss** includes potassium, a nutrient that provides improved carbohydrate production through increased photosynthesis by opening up the stomata.
- **Enfoss** is formulated with foliar nitrogen to further effect the development of disease.
- **Enfoss** is a cost effective way to provide foliar nutrients and technical phosphite that helps initiate a plant health response.

DIRECTIONS FOR USE:

- Enfoss is recommended in conjunction with a **Precision Nutrient Program®** that includes assessment of need from analytical data
- Foliar products are best applied in the early morning or evening for better absorption into the leaf tissue.
- Enfoss is compatible with all Nutricore foliar fertilizers and most commonly used pesticides. A jar test is recommended when mixing with other chemicals.
- Apply product with a minimum of 1-2 gallons of water per 1000 sqft (5-10 liters per 100 sq. m).
- Allow product to dry on leaf completely before irrigating.
- Product requires gentle agitation during use.
- Store product in a cool dry place out of direct sunlight.

GUARANTEED ANALYSIS

Nitrogen (N)	3.0%
3.0% urea nitrogen	
Phosphorus (P).....	23.0%
23% available Phosphoric acid (P ₂ O ₅)	
Soluble Potash (K ₂ O)	33.0%

APPLICATION RATES:

Cool Season Turf: Apply product at a rate of 8 pounds per acre (3 oz/or 84g/1000 sqft) or 8.9 kg/Ha (89g/100 sq. m) every 21 days or as needed

Packaged in a Net Wt: 22.68 kg, 50 lb pail.
